

ASMAR WOOD PROFILES
AGT WALL PROFILES

ABOUT

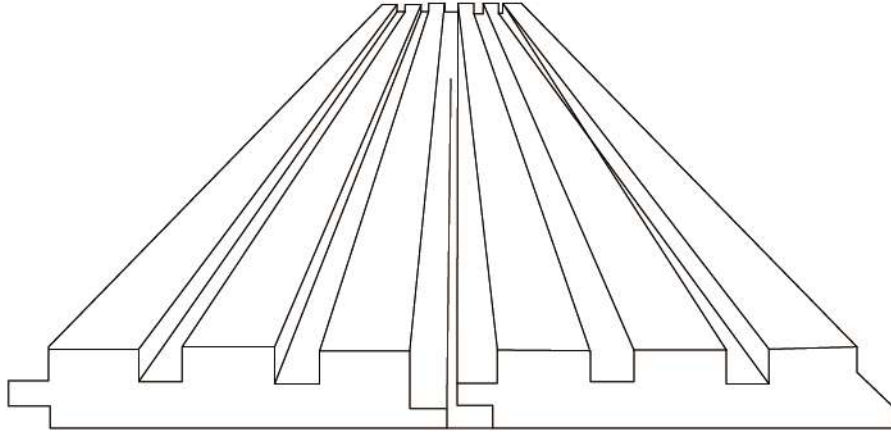

Wall profiles are also known as the most economical method among wall decorations. Using a wooden wall profile to decorate any wall in your home in a stylish way and at the same time easily add texture will be more economical than other coating materials and will create a more elegant and aesthetic appearance.

You only need to have wall profiles and mounting elements. It can be implemented almost as easily as putting two pieces of a puzzle together. Moreover, they are very practical as they can be installed piece by piece as well as easily disassembled and applied to other areas when desired. Therefore, it is possible to reuse the same wall profiles when you want to make decoration changes in different areas of the house.

AGT Wall Profiles has the Greenguard certificate, which contributes to the creation of healthier interiors.
